EDUCATION

Full Stack Software Engineering

Makers Academy
2022

MSc International Politics, Degree

SOAS University
2019

BSc Criminology

Kingston University
2017

CAREER OBJECTIVE

Since graduating Makers Academy's Software Engineering accelerator program, I have published a number of unique projects in an agile environment consisting of daily pair-programming and completing weekly code-review.

Prior to Makers, I gained 4 years of experience in English Online Consultant and gained great interpersonal skills, fostering teamwork, establishing positive relations with clients, and implementing new procedures to enhance operational efficiency. I've always looked for and developed applications to improve team efficiency and solving problems.

I'm ready to make an immediate impact as a Full Stack Engineer and I'm confident I have the skills to develop impressive, scalable and reliable software products with a positive impact in the world.

HIGHLIGHTED PROJECTS

RecipR MongoDB, Express.js, Node.js, React.js, Postman, Jest, Bootstrap - Team Project- Mern Stack final project, a blog web app that everyone can post their travel experiences and read other users travel stories, also search travel stories by destination name.

Amazon-clone React.js, Firebase database, Firebase, material UI - Personal Project
Clone of the world's largest online retailer, offering products to customers. Featuring the full CRUD functionality. Users can log in and add products to their basket, as well as, removing these products with full prices shown.

Roma Ruby-on-rails, Sinatra, RSpec, PostgreSQL - Team Project
Inspired by Airbnb, Roma is an online booking platform, connecting travelers with local hosts, allowing people to list their available spaces.

PREVIOUS EXPERIENCE

Accelerated Software Engineering Programme | Makers Bootcamp (Oct 21 – Jan 22)

Experienced OOP(object oriented programming) in Ruby & Javascript including TDD, BDD, data structures & algorithms, and testing frameworks like Rails and Jest. Involved in 2 week agile group projects with user stories, trello board discussions, MVP, pairing in 2-day sprints, stand-ups, mood check-ins and retros. Troubleshooting and debugging along the way.

Online English Consultant | Tutor ABC

(Sept 17 – July 21)

Planning & leading activities within class through virtual learning teaching a range of abilities and ages, developed an awareness of how to act as a motivating and proactive role model, engaging and supporting students.

Study Abroad Experience | Yonsei, South Korea

(Aug 15 – June 16)

Completed a 1-year exchange program studying politics & international relations in Seoul, South Korea, enriching my international outlook. On the side, I picked up the Korean Language to an intermediate level.

Immigration Solicitor Assistant | Behcet Bicakci Solicitors

(May 13 – Sept 13)

Responsible for preparing and checking all legal documents.
Managing and prioritizing in-tray tasks in order of importance and checking all legal documents.
